

# Creating Infrastructure, Building Relationships

## CAPABILITIES SUMMARY

Western Downs Civil is a diversified civil infrastructure company based in Queensland's Surat Basin, with project delivery capability across a range of industry sectors. Our key drivers are safety, quality, value and lasting relationships and we take a collaborative

approach with our clients that spans the entire project life cycle. We have partnered with some of the best known names in Infrastructure delivery and we are proud of the fact that our clients return to us again and again.

– Flexibility + Professionalism = Success

# Clients & Partners

The fundamental differentiator WDC brings to the industry is a focus on long term relationships and a high trust environment with our clients. This culture is a pivotal part of our success, driven from our Managing Director Joshua Hardimon, throughout our entire management team and workforce. **Our goal is to partner with your business** over the long term and help deliver your projects and overcome challenges together, always operating on a win-win platform. On this basis we have forged strong and lasting relationships with our clients.

Our management team includes highly experienced industry specialists in the areas of project management, safety, contract administration, scheduling, logistics, human resources and plant maintenance. WDC is fully insured and has in house quality, safety and environmental management systems based on the requirements of ISO 9001, 4801 and 14001.

If you are seeking a civil partner to assist in project management or delivery, please contact WDC. We would be happy to meet and identify how we can add value and contribute to your organisations reputation and the future success of your project.

# Capability

WDC's area of Delivery capability include;

- Project Management
- Structural foundations and bored piers
- Earthworks and road works
- Conduits drainage and stormwater
- Security Fencing
- Structural block work
- Plant hire

## Sectors

Our key delivery areas are in the Gas and Power sectors, however we have **expertise in all areas of civil and building construction** and are always open to a new sector or opportunity. We have a highly mobile and experienced crew and **specialise in remote area and high risk locations**

**We specialise in remote area and high risk locations.**

## Delivery

WDC understands that the modern infrastructure industry requires a high degree of flexibility and fast response to change and our project delivery model is structured around this. We have an internal plant and equipment division with late model, maintained and supported equipment and our entire workforce is directly employed. This gives us the ability to **respond to our clients needs at short notice** and with the certainty that a high quality, safe and professional standard will be provided at all times, regardless of the time frame or challenge presented.

**We respond to our clients needs at short notice.**

## Personnel

We underpin all of our activities, site based and otherwise, with a strong commitment to the safety of our team and all stakeholders. Our workforce is highly skilled and training is updated regularly with many of the team holding electrical authority or mine compliant inductions. We are proud of our LTIFR of 0.00 and are committed to causing zero harm to personnel or the environment on any project we are associated with. Staff turnover is low so we are able to create and maintain a culture aligned with the WDC way.

**We have a strong commitment to the safety of our team and all stakeholders, with a LTIFR of 0.00.**
